

1 ABSTRACT OF THE DISCLOSURE

2 An airbag system for jointly supporting at least two vehicle occupants inside a
3 motor vehicle in case of an accident with at least two separate airbags inflatable with a
4 gas supplied by a gas generator. The airbag system has at least two airbags (14, 15)
5 folded into a common housing (10) to be arranged in the dashboard of the motor vehicle.
6 The airbags are connected to a common gas generator (11) having at least two outflow
7 areas (13, 18, 19) assigned to the at least two airbags (14, 15). Each airbag (14, 15) is
8 sealed by a deflector (16, 17) inserted therein against the respectively other airbag (14,
9 15), and the airbags are fixed inside the housing (10).
